Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that were tested under ANSI C63.19-2007, and that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007, include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operation?

Yes

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

Yes

Website address: <http://www.cvinternet.net/Pages/Wireless/WirelessHearingAidAccessibility.php>

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Along with providing detailed information about hearing aid-compatibility of wireless phones on the Company's web site, the company has instructed its sales staff about the availability of hearing aid-compatible phone models and it has signs in each store advertising the availability of hearing aid-compatible devices. The Company also has wireless industry pamphlets available that customers can take home with information on the FCC's requirements and HAC rating system. To the extent that additional information is developed by industry or the hearing aid community on the compatibility of certain phone models with particular hearing aids, the company will endeavor to make such information available to consumers.

Methodology for Functionality Levels

Basic phones (entry-level devices offered for \$10 or less); Feature phones (devices with more advanced features and capabilities offered for more than \$10); and Smartphone/PDAs (devices that run complete operating system software as a platform for application developers).
